

Quality · Environmental Policy

CKD is determined to assure continuous improvement of quality and environmental management system across-the-board and will contribute to the achievement of the SDGs aiming for a sustainable society, to “provide products and services that satisfy our customers” with reliability and efficiency.

【Quality】

1. Practice activities to bring complaints and defects down to “zero”.
2. Build a global and innovating corporate culture:
 - a) Ascertain appropriate specifications and improve quality.
 - b) Improve cost efficiency.
 - c) Improve productivity.

【Environment】

1. Promote development and sales of environmental load reduction products.
2. Identify and comply with the environmental regulations and their requirements, and promote the realization of carbon neutrality and prevention of environmental pollution.
 - a) Reduction of CO₂ emissions.
 - b) Promotion of resource conservation.
 - c) Reduce waste.
 - d) Reduce environmental polluting materials.
