

Quality-Environmental Policy

CKD integrates diverse technologies and co-creates with its partners to solve customers' challenges.

Through these efforts, we strive to provide products and services that satisfy our customers with greater reliability and efficiency.

We are committed to the continual improvement of our quality and environmental management systems across the organization and to contributing to the realization of a sustainable society.

【Quality】

1. Practice activities to bring complaints and defects down to “zero”.
2. Build a global and innovating corporate culture:
 - a) Ascertain appropriate specifications and improve quality.
 - b) Improve cost efficiency.
 - c) Improve productivity.

【Environment】

1. Promote development and sales of low environmental impact products.
2. Identify and comply with the environmental regulations and their requirements, and promote the realization of carbon neutrality and prevention of environmental pollution.
 - a) Reduction of CO₂ emissions.
 - b) Promotion of resource conservation, such as water usage.
 - c) Reduce waste.
 - d) Reduce environmental polluting materials.
