## 1. Quarterly business results

### (1) Results of operations

During the first quarter of the fiscal year under review, the Japanese economy experienced a gradual recovery. The driving force for this recovery was brisk consumer spending, due to continued improvements in both employment conditions and the income environment. Corporate earnings improved benefitting from strong domestic demand and expansion of exports, and capital expenditure increased to strengthen production capacity and to streamline and achieve labor saving.

Meanwhile, in the overseas economies, consumer spending remained solid due to favorable employment conditions in the U.S., and the sustained expansion of corporate production activities. Europe began to recover due to influences such as changes in monetary easing measures. In China, the economy remained firm, underpinned by individual consumption despite facing a pause in the growth of infrastructure investment due to government restraints.

Against this background, the CKD Group recorded strong consolidated results in the first quarter of the fiscal year under review, with net sales of ¥30,783 million, up 20.8%, year on year, operating income of ¥2,781 million, up 2.7%, and ordinary income of ¥2,838 million up 3.4%. Net income attributable to owners of parent was ¥2,156 million, an increase of 8.1% from the same quarter last year.

#### Results of operations by segment

##### a. Automatic Machineries Products

Sales of automatic packaging systems for pharmaceuticals and food increased.

Sales of industrial machinery increased both in 3D solder paste printing inspection machines and lithium-ion battery production systems.

As a result, sales in this segment were ¥2,468 million, up 17.7% year on year, and the segment loss was ¥127 million compared to segment loss of ¥98 million in the same quarter of the previous year. Main factors included a tightening in the domestic order prices, and strategically receiving orders of overseas properties with an eye to the future expansion.

##### b. Component Products

In the Japanese market, sales increased. Factors included ongoing investment in memories for semiconductor production equipment and strong demand both in Japan and overseas for machine tools.

In overseas markets, sales increased in China, where capital investment for the automation and upgrading of production facilities is ongoing, and in South Korea and Taiwan, where semiconductor capital investment is firm.

As a result, net sales increased to ¥28,314 million, up 21.1% year on year, and segment income increased to ¥4,210 million, up 8.1% year on year. This was mainly due to increased expenses to strengthen production capacity in response to increased sales.

### (2) Financial position

Total assets at the end of the first quarter on a consolidated basis increased by ¥3,131 million from the end of the previous fiscal year to ¥134,019 million. Principle factors included increases in inventories and property, plant and equipment and occurred despite declines in cash and deposits and investment securities.

Total liabilities increased by ¥2,887 million from the end of the previous fiscal year to ¥53,716 million, mainly due to income taxes payable, long-term loans payable, and deferred tax liabilities, but this was offset by increases in notes and accounts payable-trade and provision for bonuses.

Net assets at the end of the first quarter increased by ¥244 million from the end of the previous fiscal year to ¥80,302 million.

The shareholders' equity ratio was 59.8%, a 1.3 percentage point decrease from the end of the previous consolidated fiscal year.

### (3) Earnings forecast and outlook

The earnings forecasts announced on May 14, 2018 remain unchanged for both the second quarter consolidated cumulative period and full-year forecasts. However, we need to pay close attention to the impact of trade friction between the U.S. and China, the impact of geopolitical risks, and exchange rate fluctuations.

The total company expenses mainly refers to expenses related to administration and long-term R&D expenses of CKD and costs related to CKD Global Service Corporation.

2. 'Segment income (loss)' has already been adjusted with operating income shown in the consolidated statement of income.

##### 2. Information of impairment loss of noncurrent assets and goodwill

(Gain on major bargain purchase)

Due to the acquisition of the shares of Nikki Denso Co., Ltd. (Re-named CKD Nikki Denso Co., Ltd. as of June 1, 2017), it became a consolidated subsidiary from the first quarter of the consolidated fiscal year under review and a gain on bargain purchase of ¥149 million was booked to the Component Products segment. Moreover, since the gain on bargain purchase is recorded as extraordinary income, it is therefore not included in segment income.
