

Environment-Resistant Compact Cylinder SMG-G-HP1 Series

INSTRUCTION MANUAL

SM-A62640-A

- Read this Instruction Manual before using the product.
- Read the safety notes carefully.
- Keep this Instruction Manual in a safe and convenient place for future reference.

PREFACE

Thank you for purchasing CKD's " **SMG-G-HP1 Series**" **Environment-Resistant Compact cylinder**. This Instruction Manual contains basic matters such as installation and usage instructions in order to ensure optimal performance of the product. Please read this Instruction Manual thoroughly and use the product properly.

Keep this Instruction Manual in a safe place and be careful not to lose it.

Product specifications and appearances presented in this Instruction Manual are subject to change without notice.

- The product is intended for users who have basic knowledge about materials, piping, electricity, and mechanisms of pneumatic components. CKD shall not be responsible for accidents caused by persons who selected or used the product without knowledge or sufficient training.
- Since there are a wide variety of customer applications, it is impossible for CKD to be aware of all of them. Depending on the application or usage, the product may not be able to exercise its full performance or an accident may occur due to fluid, piping, or other conditions. It is the responsibility of the customer to check the product specifications and decide how the product shall be used in accordance with the application and usage.

SAFETY INFORMATION

When designing and manufacturing any device incorporating the product, the manufacturer has an obligation to ensure that the device is safe. To that end, make sure that the safety of the machine mechanism of the device, the fluid control circuit, and the electric system that controls such mechanism is ensured.

To ensure the safety of device design and control, observe organization standards, relevant laws and regulations, which include the following:

ISO 4414, JIS B 8370, JFPS 2008 (the latest edition of each standard), the High Pressure Gas Safety Act, the Industrial Safety and Health Act, other safety rules, organization standards, relevant laws and regulations

In order to use our products safely, it is important to select, use, handle, and maintain the products properly.

Observe the warnings and precautions described in this Instruction Manual to ensure device safety.

Although various safety measures have been adopted in the product, customer's improper handling may lead to an accident. To avoid this:

Thoroughly read and understand this Instruction Manual before using the product.

To explicitly indicate the severity and likelihood of a potential harm or damage, precautions are classified into three categories: "DANGER", "WARNING", and "CAUTION".

 DANGER	Indicates an imminent hazard. Improper handling will cause death or serious injury to people.
 WARNING	Indicates a potential hazard. Improper handling may cause death or serious injury to people.
 CAUTION	Indicates a potential hazard. Improper handling may cause injury to people or damage to property.

Precautions classified as "CAUTION" may still lead to serious results depending on the situation. All precautions are equally important and must be observed.

Other general precautions and tips on using the product are indicated by the following icon.

Indicates general precautions and tips on using the product.

Precautions on Product Use

WARNING

The product must be handled by a qualified person who has extensive knowledge and experience.

The product is designed and manufactured as a device or part for general industrial machinery.

Use the product within the specifications.

The product must not be used beyond its specifications. Also, the product must not be modified and additional work on the product must not be performed.

The product is intended for use in devices or parts for general industrial machinery. It is not intended for use outdoors or in the conditions or environment listed below.

- In applications for nuclear power, railroad system, aviation, ship, vehicle, medical equipment, and equipment that directly touches beverage or food.
- For special applications that require safety including amusement equipment, emergency shut-off circuit, press machine, brake circuit, and safety measures.
- For applications where life or properties may be adversely affected and special safety measures are required.

(Exception is made if the customer consults with CKD prior to use and understands the specifications of the product. However, even in that case, safety measures must be taken to avoid danger in case of a possible failure.)

Do not handle the product or remove pipes and devices until confirming safety.

- Inspect and service the machine and devices after confirming the safety of the entire system. Also, turn off the energy source (air supply or water supply) and power to the relevant facility. Release compressed air and fluid from the system and use extreme care to avoid water or electric leakage.
- Since there may be hot or live parts even after operation has stopped, use extreme care when handling the product or removing pipes and devices.
- When starting or restarting a machine or device that incorporates pneumatic components, make sure that a safety measure (such as a pop-out prevention mechanism) is in place and system safety is secured.

Precautions on Product Disposal

CAUTION

When disposing of the product, comply with laws pertaining to disposal and cleaning of wastes and have an industrial waste disposal company dispose of the product.

1. PRODUCT OVERVIEW

1.1 Model Number Indication

1.1.1 Product model number

■ Example of model number indication

Without switch (without magnet for switch)

SMG-G - 32 - 25 - HP1

With switch (built-in magnet for switch)

SMG-GL - 32 - 25 - K2H - R - HP1

A Model No.

B Bore size

C Port thread

D Stroke

E Switch model No.

F Switch quantity

Code		Description					
A Model No.							
SMG-G		Double acting/single rod/rubber scraper					
SMG-GL		Double acting/single rod/rubber scraper/with switch					
B Bore size (mm)							
6		ø6					
10		ø10					
16		ø16					
20		ø20					
25		ø25					
32		ø32					
C Port thread							
Blank		Rc thread					
NN		NPT thread (ø32 only) (made to order)					
GN		G thread (ø32 only) (made-to-order product)					
D Stroke (mm)		Applicable bore size

1.2 Specifications

1.2.1 Product specifications

Model	SMG-G-HP1					
Descriptions	SMG-GL-HP1					
Bore size mm	φ6	φ10	φ16	φ20	φ25	φ32
Actuation	Double acting					
Working fluid	Compressed air					
Max. working pressure MPa	0.7					
Min. working pressure MPa	0.12	0.06			0.15	
Proof pressure MPa	1.05					
Ambient temperature °C	-10 to 60 (no freezing)					
Port size	M5					Rc1/8
Stroke tolerance mm	+1.5 0					
Working piston speed mm/s	50 to 500					
Cushion	With rubber cushion					
Lubrication	Not required					
Allowable absorbed energy J	0.012	0.036	0.1	0.1	0.19	0.5

The min. working pressure in the specifications column indicates the initial value.
Depending on the conditions of use or duration of use, the specifications may be exceeded.

1.2.2 Switch specifications

Descriptions	Reed 2-wire type			
	K0H/V		K5H/V	
Applications	For programmable controller, relay		For programmable controller, relay, IC circuit(without indicator), serial connection	
Power supply voltage	—			
Load voltage	12/24 VDC	110 VAC	5/12/24 VDC	110 VAC
Load current	5 mA to 50 mA	7 mA to 20 mA	50 mA or less	20 mA or less
Current consumption	—			
Internal voltage drop	3 V or less (For DC, when the load current is 30mA)		0.1 V or less (Internal resistance 0.5 Ω or less.)	
Indicator	Red LED (Lights up when turned on)		—	
Leakage current	—			
Lead wire	Standard is 1 m (Oil-resistant vinyl cabtyre 2 core cord, 0.2 mm ²)			
Shock resistance	294m/s ²			
Insulation resistance	20 MΩ or more with 500 VDC megger			
Withstand voltage	No abnormality after applying 1000 VAC for one minute			
Ambient temperature	-10°C to 60°C			
Degree of protection	IP 67 (IEC standard). JIS C 0920 (watertight). oil-resistant			

Descriptions	Proximity 2-wire type	
	K2H/V	K2YH/V
Applications	Only for programmable controller	
Power supply voltage	—	
Load voltage	10 to 30VDC	
Load current	5 to 20mA	
Current consumption	—	
Internal voltage drop	4V or less	
Indicator	Red LED (Lights up when turned on)	Red/green LED(Lights up when turned on)
Leakage current	1 mA or less	
Lead wire	Standard is 1 m (Oil-resistant vinyl cabtyre 2 core cord, 0.2mm ²)	Standard is 1 m (Oil-resistant vinyl cabtyre 2 core cord, 0.3mm ²)
Shock resistance	980m/s ²	
Insulation resistance	20 MΩ or more with 500 VDC megger	100 MΩ or more with 500 VDC megger
Withstand voltage	No abnormality after applying 1000 VAC for one minute	
Ambient temperature	-10°C to 60°C	
Degree of protection	IP 67 (IEC standard), JIS C 0920 (watertight), oil-resistant	

Descriptions	Proximity 3-wire type		
	K3H/V(NPN output)	K3PH/V(PNP output)	K3YH/V(NPN output) (2-color display)
Applications	For programmable controller, relay		
Power supply voltage	10 to 28VDC		
Load voltage	30VDC or less		
Load current	50 mA or less		
Current consumption	10 mA or less at 24 VDC	10mA or less at 24 VDC	10 mA or less at 24 VDC
Internal voltage drop	0.5V or less		
Indicator	Red LED (Lights up when turned on)	Yellow LED (Lights up when turned on)	Red/green LED (Lights up when turned on)
Leakage current	10 μ A or less		
Lead wire	Standard is 1 m (Oil-resistant vinyl cabtyre 3 core cord, 0.2 mm ²)		
Shock resistance	980m/s ²		
Insulation resistance	20 M Ω or more with 500 VDC megger		100 M Ω or more with 500 VDC megger
Withstand voltage	No abnormality after applying 1000 VAC for one minute		
Ambient temperature	-10°C to 60°C		
Degree of protection	IP 67 (IEC standard), JIS C 0920 (watertight), oil-resistant		

2. INSTALLATION

2.1 Environment

CAUTION

When using the product in a cutting, casting, or welding plant, install a cover to prevent foreign matters such as cutting fluid, chips, powder, and dust from entering.

Do not use the equipment in the following environments.

- Where cutting oil can splash onto the product (abrasives and polishing powder in the oil can abrade the sliding section)
- Where organic solvents, chemicals, acids, alkalis, and kerosene are present
- Where water can splash onto the product

- Use the product within the following ambient temperature range.
 - -10°C to 60°C (no freezing)
- For compressed air, use clean and dry air that has been passed through an air filter. Use an air filter in the circuit and be careful with the filtration rate (a filter that removes particles exceeding $5\text{ }\mu\text{m}$ is desirable), flow rate, and mounting position (install the filter near the directional control valve).

2.2 Unpacking

- Check that the model number ordered and the model number indicated on the product are the same.
- Check the exterior of the product for any damage.
- When storing the product, take proper measures to prevent foreign matters from entering the cylinder.

2.3 Mounting

- The mounting method of cylinder and switch are the same as the SMG standard type. For details, refer to the SMG standard type instruction manual described in Section 6 "Reference information".

2.4 Piping

WARNING

Insert the tube into the fitting until it firmly rests on the tube end and make sure that the tube does not come off before use.

- Use pipes that are made of corrosion-resistant materials after the filter such as zinc-plated pipes, nylon tubes, and rubber tubes.
- Use pipes with an effective cross-sectional area that allows the cylinder to achieve the predetermined piston speed.
- Install the filter for removing rust, foreign matters, and drainage from the piping as close as possible to the solenoid valve.
- Observe the effective thread length for the gas pipes.
- In addition, chamfer the threaded end of the pipes by about a 1/2 pitch.

■ Pipe cleaning

Before piping, blow air into the pipes to clean the interior and to remove cutting chips and foreign matters.

■ Seal material

Use a seal tape or a seal material to stop leakage from piping.

Apply a seal tape or seal material to the screw threads leaving two or more threads at the pipe end uncovered or uncoated. If the pipe end is fully covered or coated, a shred of seal tape or residue of seal material may enter inside of the pipes or device and cause a failure.

When using a seal tape, wind it around the screw threads in the direction opposite from the screw threads and press it down with your fingers to attach it firmly.

When using a liquid seal material, be careful not to apply it to resin parts. The resin parts can become damaged and this may lead to a failure or malfunction.

Also, do not apply seal material to the internal threads.

2.4.1 Piping joint

Because the usable piping joint has limitations, for using it, see the below.

Bore size	Port size	Recommended fittings	Bore size	Port size	Recommended fittings
6	M5	SC3W-M5-4,6 SC3U-M5-4,6 GWS4-M5 GWS6-M5 GWS4,6-M5-S GWL4-M5 GWL6-M5	20	M5	SC3W-M5-4,6 SC3U-M5-4,6 GWS4-M5 GWS6-M5 GWS4,6-M5-S GWL4-M5 GWL6-M5
10	M5	SC3W-M5-4,6 SC3U-M5-4,6 GWS4,6-M5 GWS4,6-M5-S GWL4,6-M5	25	M5	SC3W-M5-4,6 SC3U-M5-4,6 GWS4,6-M5 GWS4,6-M5-S GWL4,6-M5
16	M5	SC3W-M5-4,6 SC3U-M5-4,6 GWS4-M5 GWS6-M5 GWS4-M5-S GWS6-M5-S GWL4-M5 GWL6-M5	32	Rc1/8	SC3W-6-4,6,8 SC3U-6-4,6,8 GWS4,6,8-6 GWS4,6,8-6-S GWL4,6,8-6

Note1: Excluding 5 stroke length or mounting method in "Fig. 1".

Note2: Excluding 5,10 stroke length or mounting method in "Fig. 1".

Fig. 1

2.5 Wiring

- The switch wiring method is the same as the SMG standard type.
For details, refer to the SMG standard type instruction manual described in Section 6 "Reference information".

3. USAGE

3.1 Using the Cylinder

CAUTION

Keep the range of load connected to the rod reasonable to prevent rod from being damaged due to the excessive energy of momentum inertia.

Carefully prevent lateral load to the rod to avoid irregular wear and tear of rod cover or rod itself.

■ Working pressure range

Use the cylinder within the following pressure range:

Model	Bore size	Pressure range
SMG-G-HP1	φ6	0.12 to 0.7MPa
	φ10,16	0.06 to 0.7MPa
	φ20,25,32	0.15 to 0.7MPa

■ How to adjust the cushion

Although a rubber cushion is internally provided for this type of cylinder, it is advisable to install an additional external stopper when the kinetic energy is excessive.

Tolerable kinetic energy is as the graphs below indicate.

Bore size(mm)	φ6	φ10	φ16	φ20	φ25	φ32
Allowable energy absorption (J)	0.012	0.036	0.1	0.1	0.19	0.5

■ Adjustment of the piston speed

Mount a speed controller to adjust the piston speed.

3.2 Using the Switch

■ Magnetic environment

Do not use the switch in a place where there is a strong magnetic field or large current (such as a large magnet or welding machine). If switch mounted cylinders are installed close to each other and in parallel or if magnetic substances are moving close to the cylinder, the magnetic forces may interfere with each other and affect the detection accuracy.

- The cylinder switch may malfunction if there is a magnetic object such as a steel plate installed nearby. Make sure that there is a distance of at least 3.5 mm between the magnetic object and the surface of the cylinder.

- The cylinder switch may malfunction if the cylinder units are placed adjacently. Make sure to provide the following distance between each unit.

Adjacent conditions		Switch model No.	φ6	φ10	φ16	φ20	φ25	φ32	Remarks	
Two cylinders in parallel	Horizontal mounting 	A	K0,K5	27	29	37	45	55	67	
			K2,K3							
		B	K0,K5	4.5						
			K2,K3							
	Vertical mounting Switches are attached on the side of the adjacent cylinders. 	A	K0,K5	28	21	25	33	41	46	Note that switch position cannot be adjusted if the length of the screwdriver is longer than B dimension with cylinders mounted.
			K2,K3	25	28	35	40	50	55	
		B	K0,K5	5.5	5.5	5.5	6.5	8.5	5.5	
			K2,K3	11.5	12.5	14.5	14.5	17.5	14.5	
Vertical mounting Switches are attached on the opposite side of the horizontal cylinders 	A	K0,K5	14	16	21	27	33	41		
		K2,K3								
	B	K0,K5	0.5							
		K2,K3								
Three or more cylinders in parallel	Horizontal mounting 	A	K0,K5	27	29	37	45	55	67	
			K2,K3							
		B	K0,K5	4.5						
			K2,K3							
	Vertical mounting 	A	K0,K5	19	22	26	34	42	47	Note that switch position cannot be adjusted if the length of the screwdriver is longer than B dimension with cylinders mounted.
			K2,K3	27	29	35	44	51	56	
		B	K0,K5	6.5	6.5	6.5	7.5	9.5	6.5	
			K2,K3	13.5	13.5	14.5	17.5	18.5	15.5	

■ Wiring of lead wires

When wiring, be careful not to apply bending stress and tension repeatedly to lead wires.
For movable sections, use wiring material with the same level of bending resistance as the robot wire.

■ Ambient temperature

Do not use the switch in a high temperature environment (60°C or more).
Using the switch in a high temperature environment may affect its performance due to the temperature characteristics of magnetic parts and electronic parts.

■ Intermediate position detection

When the switch is operated at an intermediate position in the length of the stroke, the relay will not respond if the piston speed is too high.
If the operation time of the relay is 20 ms, keep the piston speed at 500 mm/s or less.

■ Shock

Do not subject the product to strong vibrations and shocks when transporting the cylinder and mounting and adjusting the switch.

4. MAINTENANCE AND INSPECTION

WARNING

Do not touch electrical wiring connections (bare live parts) of cylinders equipped with switches, and other such cylinders.

Do not touch live parts with bare hands.

An electric shock may occur.

Turn off the power, release the residual pressure and make sure that there is no residual pressure before disassembling or inspecting the cylinders.

CAUTION

Plan and perform daily and periodic inspections so that maintenance can be managed properly.

If maintenance is not properly managed, the product's functions may deteriorate significantly and this may lead to faults (such as short service life, damage, and malfunction) or accidents.

4.1 Periodic Inspection

In order to use the product under optimum conditions, perform a periodic inspection once or twice a year.

4.1.1 Inspection item

- Actuation state
- Change in the piston speed and cycle time
- External and internal leakages
- Damage and deformation of the piston rod
- Stroke abnormality

Check the items above and refer to "5. TROUBLESHOOTING" to correct any abnormality found. If there are loose threaded connections, tighten them.

4.1.2 Maintenance of the product

This cylinder does not require lubrication.

4.1.3 Maintenance of the circuit

- Discharge the drainage accumulated in the air filter periodically before it exceeds the specified line.
- Since foreign matters such as carbide (carbon or tar substance) from the compressor oil may contaminate the circuit and cause an operation fault of the solenoid valve or the cylinder, be careful when performing maintenance or inspection of the compressor.

4.2 Disassembly method, Assembly method

If any failure occurs such as air leakage, disassemble the product, referring to the internal structural diagram and instruction manual of SMG (standard), then exchange the parts in the consumable parts list.

- Follow reverse steps of disassembling during the process of assembling after cleaning parts. Carefully avoid giving damage to packings to prevent malfunction or air leakage.

Consumable parts list

Bore size (mm)	Kit no.	Remarks
φ6	SMG-G-6K-HP1	Scraper Lub-keeper CR ring
φ10	SMG-G-10K-HP1	Rod packing Cushion rubber(R) Piston packing
φ16	SMG-G-16K-HP1	Cushion rubber(H) Cover gasket

Bore size (mm)	Kit no.	Remarks
φ20	SMG-G-20K-HP1	Scraper Lub-keeper
φ25	SMG-G-25K-HP1	Rod packing Cushion rubber(R) Piston packing
φ32	SMG-G-32K-HP1	Cushion rubber(H) Cover gasket

5. TROUBLESHOOTING

5.1 Problems, Causes, and Solutions

If the product does not operate properly, check the table below for a possible solution.

5.1.1 Cylinder

Problem	Cause	Solution
Does not operate.	No pressure or insufficient pressure is applied.	Secure sufficient pressure.
	No signal is input to directional control valve.	Repair the control circuit.
	Centers were not aligned when mounted.	Correct the way the cylinder is mounted. Change the mounting style.
	Piston packing is damaged.	Replace the packing.
Does not operate smoothly.	Speed is lower than minimum working piston speed.	Mitigate load fluctuation.
	Centers were not aligned when mounted.	Correct the way the cylinder is mounted. Change the mounting style.
	Lateral load is applied.	Install a guide. Correct the way the cylinder is mounted. Change the mounting style.
	Load is too large.	Increase the pressure. Enlarge the bore size.
	Speed control valve has meter-in circuit.	Change the mounting direction of the speed control valve.
Damaged or deformed.	Force of shock due to high-speed actuation is excessive.	Decrease the speed. Lighten the load. Install a more effective cushion mechanism (external cushion mechanism).
	Lateral load is applied.	Install a guide. Correct the way the cylinder is mounted. Change the mounting style.

5.1.2 Switch

Problem	Cause	Solution
Switch turns on but indicator does not blink.	Contact is welded.	Replace the switch.
	Rating of load is exceeded.	Replace the relay with one recommended by CKD or replace the switch.
	Indicator is damaged.	Replace the switch.
	External signal is faulty.	Check the external circuit.
Switch does not turn on.	Cables are disconnected.	Replace the switch.
	External signal is faulty.	Check the external circuit.
	Voltage is wrong.	Use specified voltage.
	Switch is not mounted in right place.	Mount the switch in right place.
	Switch is not positioned correctly.	Position and tighten the switch correctly.
	Switch is facing opposite direction.	Mount the switch so that it faces the correct direction.
	Load (relay) cannot respond for intermediate position detection.	Lower the speed. Replace the relay with one recommended by CKD.
	Rating of load is exceeded.	Replace the relay with one recommended by CKD or replace the switch.
Switch does not turn off.	Piston is not moving.	Move the piston.
	Contact is welded.	Replace the switch.
	Rating of relay is exceeded.	Replace the relay with one recommended by CKD or replace the switch.
	Ambient temperature is too high or too low.	Use the switch at an ambient temperature of -10°C to 60°C .
	Magnetic field is nearby.	Install a magnetic shield.
	External signal is faulty.	Check the external circuit.

If you have any other questions or concerns, contact your nearest CKD sales office or distributor.

6. REFERENCE INFORMATION

- SMG standard type instruction manual No....SM-650582-A
The mounting method of cylinder and switch, switch wiring method, disassembly and assembly method are the same as the SMG standard type. So please also confirm the above SMG standard type instruction manual.

7. WARRANTY PROVISIONS

7.1 Warranty Conditions

■ Warranty coverage

If the product specified herein fails for reasons attributable to CKD within the warranty period specified below, CKD will promptly provide a replacement for the faulty product or a part thereof or repair the faulty product at one of CKD's facilities free of charge.

However, following failures are excluded from this warranty:

- Failure caused by handling or use of the product under conditions and in environments not conforming to those stated in the catalog, the Specifications, or this Instruction Manual.
- Failure caused by incorrect use such as careless handling or improper management.
- Failure not caused by the product.
- Failure caused by use not intended for the product.
- Failure caused by modifications/alterations or repairs not carried out by CKD.
- Failure that could have been avoided if the customer's machinery or device, into which the product is incorporated, had functions and structures generally provided in the industry.
- Failure caused by reasons unforeseen at the level of technology available at the time of delivery.
- Failure caused by acts of nature and disasters beyond control of CKD.

The warranty stated herein covers only the delivered product itself. Any loss or damage induced by failure of the delivered product is excluded from this warranty.

■ Confirmation of product compatibility

It is the responsibility of the customer to confirm compatibility of the product with any system, machinery, or device used by the customer.

■ Others

The terms and conditions of this warranty stipulate basic matters.

When the terms and conditions of the warranty described in individual specification drawings or the Specifications are different from those of this warranty, the specification drawings or the Specifications shall have a higher priority.

7.2 Warranty Period

The product is warranted for one (1) year from the date of delivery to the location specified by the customer.
