Space saving

The exterior is reduced by using a compact sensor.

volume ratio **70% or less**

Degree of protection

Dust-proof/waterproof standard "IP67" compatible.

Dust-proof/waterproof standards **IP67 Compatible**

Lightweight and downsizing

A weight of 18 grams realized. Mountable on compact hand-chuck.

Weight **46% or less**

High water resistance

Calculation based on CKD's unique standards. More than 6 times that of conventional models.

Water resistance **6X or more than conventional**

Compatibility with conventional products

Magnet replacement not required. The switch only needs to be replaced.

Compatibility **Magnet change Not required**

Reduced wiring space

The use of a bend-resistant wire allows for thinner wires and can be accommodated in the T-shaped groove of the cylinder.

Lead wire **Bend resistant material**

Precautions for use

Be sure to read this section before use. Also refer to the precautions in "Pneumatic Cylinders I and II" (No.CB-029SA, CB-030SA).

⚠CAUTION

■ These have been improved with respect to water (coolant), but have IEC standards IP67 structure. Therefore, constant water (In an environment where coolant is applied, malfunction may occur at an early stage. Service life performance varies depending on the type of liquid (coolant, etc.) used. Be sure to carry out the installation test with the actual device before use.

If the goods and/or their replicas, the technology and/or software found in this catalog are to be exported from Japan, Japanese laws require the exporter makes sure that they will never be used for the development and/or manufacture of weapons for mass destruction.
