Names and functions of display/operation section

Output display

 Display color changes once the threshold is reached. (Display color can be set to green or orange)

SET/OK key

- Use to confirm the set value.
- Use to cancel when in setting mode.
- Activates numerical input.
- Use to enter settings mode.
- Use to return to the RUN mode.
- Use to revise settings (return to the settings existing when setting mode was entered).

Main screen display

Displays reference value, various set values and model status.

Notification display

Used when setting the notification display.

Sub-screen display

Displays the threshold, detection pressure and various settings.

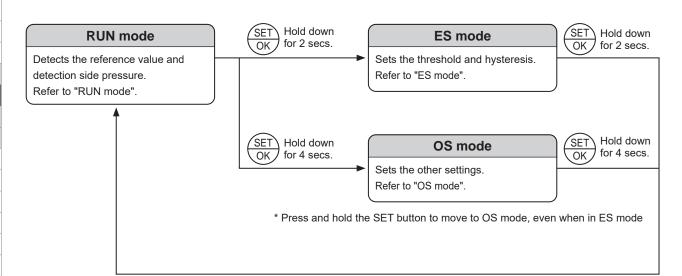

◯ Key

- Use to switch to the sub-screen when in RUN mode.
- When setting various data, this key is used to increase set values, etc.
- Use to change the setting mode.

⊘Key

- Use to switch to the sub-screen when in RUN mode.
- When setting various data, this key is used to decrease set values. etc.
- Use to change the setting mode.

Setting

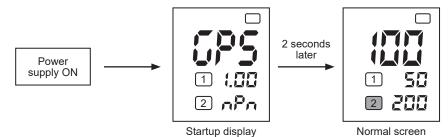

Operation mode

RUN mode (normal operation)

● RUN mode is the regular display and output operation mode which succeeds the startup display when the power is turned ON.

Startup display

The following startup display appears when the power is turned ON.

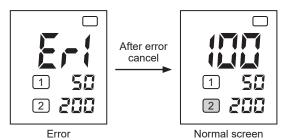

Normal screen

Screen	Dis	Diaplay color			
	GPS3-E (short range)	GPS3 (wide range)	Display color		
	10 to 200	20 to 500			
Main screen	FF (beyond display range upper limit)	FF (beyond display range upper limit)	Green display		
	-FF (beyond display range lower limit)	-FF (beyond display range lower limit)			
	Threshold (CH1/2): 10 to 200, no display	Threshold (CH1/2): 20 to 500, no display			
	Detection side output kPa: 0 to 220	Detection side output kPa: 0 to 220			
Sub screen	bar: 0 to 2.20 (overseas option only)	bar: 0 to 2.20 (overseas option only)	Green display		
	psi: 0 to 31.9 (overseas option only)	psi: 0 to 31.9 (overseas option only)			
	Output display: ON/OFF (IO-Link compatible option only)	Output display: ON/OFF (IO-Link compatible option only)			
CH1/2 output		N	2-color display (green/orange)		
display		IN .	*Freely configurable		
Notification	Blinking	or OFF	Oranga diaplay		
display	* Freely configurable	(default setting: OFF)	Orange display		

Detecting abnormalities

At error detection, the main screen displays an error code indicating the content of the abnormality. (Error code display remains until the error is canceled.)

Error display	Description	Countermeasures	Į			
Er1	Sensor signal error *1	Displayed when there is a disconnection or the sensor signal exceeds the full scale.				
	(damage/disconnection/over pressure (more than 250 kPa)/P2 ≥ P1 x 1.1)	Return supply pressure to within the rated pressure range.				
Er2	Outside setting range (0-point calibration)	Turn the supply pressure OFF and conduct 0-point calibration at atmospheric pressure.	/			
Er3	Outside setting range (various settings)	Configure within each setting range.				
Er4	PIN entry error	Enter the set PIN.				
Er7	Temperature sensor error *1	Use within the operating temperature range (0 to 50°C).	1			
Er8	Overcurrent (contact output) *1	Ensure the output current is 100 mA or less.	1			
Er9	Memory error (ROM/RAM/EEPROM)	Contact CKD for details.	-			
-H- (blinking)	Supply pressure is above 220 kPa *1	Lower the supply pressure to within the rated pressure range.	L			
-L- (blinking)	Supply pressure is below 45 kPa *1	Raise the supply pressure to within the rated pressure range.	١,			
FF	Above dienlev range upper limit	GPS3-E: above 200, GPS3: above 500	1			
ГГ	Above display range upper limit	Detect distance within the reference value display range.				
-FF	Polow diaplay range lower limit	GPS3-E: below 10, GPS3: below 20				
	Below display range lower limit	Detect distance within the reference value display range.				

^{(*1:} Output is OFF. Automatic recovery when back within specification range.)

Initializing

With the power supply OFF, press SET + \triangle + ∇ buttons simultaneously and turn the power ON.

Easy setting (in RUN mode)

Frequently used settings can be configured during regular operation.

Sub screen selection

 \bigcirc or \bigcirc can be used to switch to the sub screen.

CH1 auto threshold setting

Press and hold SET + (2) (2 seconds or more) to set the current display value to the CH1 threshold.

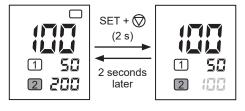

*Er3 will be displayed on the sub screen if this is outside the configurable range.

CH2 auto threshold setting

Press and hold SET + \bigcirc (2 seconds or more) to set the current display value to the CH2 threshold.

*Er3 will be displayed on the sub screen if this is outside the configurable range.

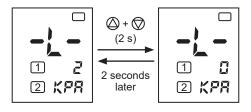

0-point calibration

 \bigcirc + \bigcirc (2 seconds or more) to set the detection side pressure 0-point calibration. 0-point drift can be calibrated.

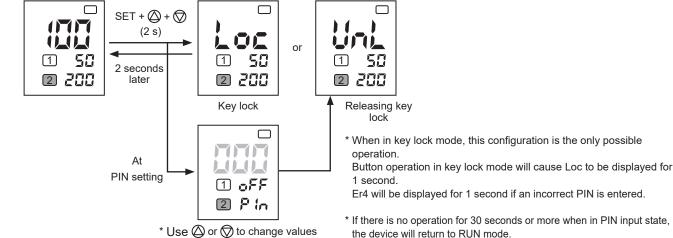

Set the supply pressure to OFF before making this setting.

*Er2 will be displayed on the main screen if this is outside the configurable range.

Key lock

Press and hold SET+ (2) + (2) (2 seconds or more) to set key lock and release settings. Take care during button operation to ensure that each setting is not modified incorrectly.

ES mode

Sets the threshold and hysteresis.

Regular operation is halted when entering ES mode. * Outputs retain their status as of when the mode was entered.

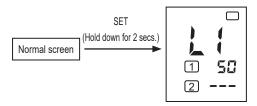

(1) ES mode list

Display	Setting items	Description
L1	CH1 threshold	CH1 threshold setting
H1	CH1 hysteresis	CH1 hysteresis setting
L2	CH2 threshold	CH2 threshold setting
H2	CH2 hysteresis	CH2 hysteresis setting

(2) Moving to ES mode

Press and hold SET (2 seconds or more) to move from the normal screen to ES mode.

After moving to ES mode, use \bigcirc or \bigcirc to switch among setting items.

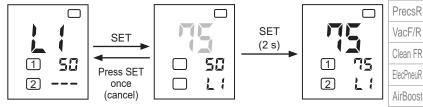

(3) Returning to the normal screen

Press and hold SET (2 seconds or more) to move to RUN mode.

CH1 threshold setting (At shipment: 50)

CH1 threshold should be set to no display or to a value in the table below.

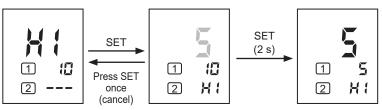

GPS3-E (short range)	10 to 200
GPS3 (wide range)	20 to 500

* Use 🔘 or 🔘 to change values

CH1 hysteresis setting (At shipment: 10)

CH1 hysteresis can be set from 1 to 20.

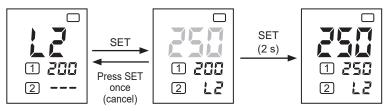

* Use 🔘 or 🔘 to change values

CH2 threshold setting (At shipment: 50)

CH2 threshold should be set to no display or to a value in the table below.

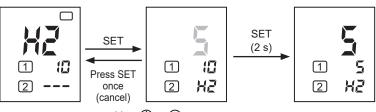

GPS3-E (short range)	10 to 200
GPS3 (wide range)	20 to 500

* Use 🛆 or 🗑 to change values

CH2 hysteresis setting (At shipment: 10)

CH2 hysteresis can be set from 1 to 20.

* Use ∅ or ♥ to change values

Master gauge installation

* Use ∅ or ♥ to input values

55

1 500

2 (or

* Use 🛆 or 🔘 to select Goo or oGG

SET

SET

[1] Master setting:

After installing the reference master gauge, enter the reference value numerically and record the pressure with the master gauge installed. GPS3-E 20 to 100

[2] Open setting: GPS3 30 to 100

Record the pressure with the nozzle open. Note: Fully open the nozzle when using this setting.

Setting of display color (Default: Goo)

Sets the CH1/2 ON/OFF display colors.

From left: No output/CH1: ON/CH2: ON display colors. (G is green, o is orange)

(Default: OFF) Setting of screen non-display

Sets the main/sub screen non-display settings. Non-display for all except output display and notification display. (With this setting ON and 3 minutes without key operation)

SFT Por SET (2s)1 off 1 off 1 2 2 Por 2 Por

* Select OFF or ON with (a) or (b)

Setting of notification display (Default: OFF)

Configure the variation in detection side pressure (%) required to activate this function. If the detection side pressure exceeds the set ratio:

Display blinks slowly (nozzle may be blocked) (*1) If the detection side pressure falls below the set ratio: Display blinks rapidly (internal orifice may be blocked)

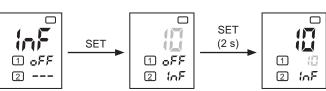

(*1) When the light is blinking without a workpiece present (Blinking also occurs during regular contact, due to the detection structure)

Set the supply pressure to ON and set the nozzle to the open state. Er3 will be displayed on the main screen if this is outside the supply range

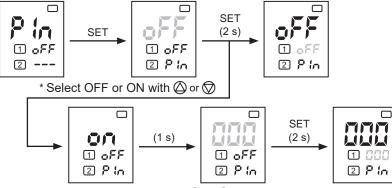

Setting of PIN (Default: OFF)

Sets the PIN (000 to 999) required to release the key lock

* Pressing the SET button once before confirming any setting will cancel.

* Use or to change values (1 to 80)
